

PIDX Standards and Guidelines Update 2018 US Spring Conference

Marc Battistello

Chair of PIDX Standards and Guidelines Committee

2018 Proposed Projects Scope

Topic	Area	Priority	Scope
Supply Notification	Downstream	High	Complete standard
Field Ticket Electronic Approval Workflow	Business Process/Field Ticket	High	-Define To-Be process using electronic WFs. -Identify messaging needs/updates. -Develop messaging standards. Consider JSON messaging -Pilot
Blockchain PIDX Scoping	Business Process/Messaging	High	Determine what/where PIDX will work in the Blockchain area
OpenPEPPOL mapping to/from PIDX	Business Messaging	Medium	Study of mapping between OpenPEPPOL/UBL and PIDX XML and access point to access point model.
Material Master Standards & Hierarchy	Cat. & Class.	Medium	BP, Murphy, Exxon – Operators
TDXS Ph 3	Downstream	Medium	Initiate Ph 3 TDXS roadmap.
Price Unit Support	Business Messaging	Medium	PTP submitted to extend price precision.
Unit of Measurement Codes - Standards	Cat. & Class.	Medium	Define Unit of Measurement codes that should be used for Catalogs and Electronic invoices. Imperial and Metric system. At this time the exception table is bigger than UNECE or ANSI UoM code System because customers want their own UoM codes and sometimes those codes do not follow any standard
API Management for IOT (Internet of Things)	Business Messaging	Low	IOT space.
Review AS4 as supported transport	Business Messaging	Low	Review AS4 TRP and determine PIDX support levels.

● Top Priority

Focus on kicking off and confirming 2 member support

● Med. Priority

Will kickoff with 2 member support and PM

● Low Priority

Not expecting to initiate in 2018
