

The Human Side of Standardization

November 14, 2016

Peggy Montana
Director, Shell Midstream Partners

My Experience

Benefits of Standardization

Enables smooth handoff between processes

Make possible performance comparisons

Common language and better understanding of how the business operates

Multiple Companies

Makes commerce easier for the same reasons above

Can allow for easier offshoring/outsourcing of processes

“Frictionless” Commerce is Key

Change Management is Key

Business Context – Shell Adapting to Changing World

100 years of success and growth through strong local autonomy and proximity to the customers...

...challenged by the requirements of a globalised world.

The Case for Change

media reporting -1999-2001

Will Shell stop cutting and start chasing growth?

To grow or not to grow? Phil Watts, the new chairman of the committee of managing directors of Royal Dutch/Shell group of companies, must provide the answer. He needs to answer today to hundreds of investment analysts, both in the City and on Wall Street, who are desperate for guidance. Not to mention thousands of fund managers and small investors who have watched Shell's stock plummet from a peak of 637p in July to 450p. Shell is the classic widows' curse.

Shell profits fall 53% in worst result

Mark Moody-Stuart, chairman of Royal Dutch/Shell, announced a 53% plunge in profits.

Shell fails to impress despite earnings jump – Royal Dutch/Shell

ROYAL Dutch/Shell boasted record quarterly earnings yesterday but failed to impress the City, which was expecting an even bigger bonus from the \$20-plus per barrel oil price.

Mark Moody-Stuart, Shell's chairman, warned his staff yesterday to guard against complacency as he announced that current cost earnings had risen by 115 per cent to \$1.8 billion (€1.1 billion).

He said: "We have all had to swallow some harsh medicine in the last year and I can't promise there isn't more to come."

5 November 1999, The Times

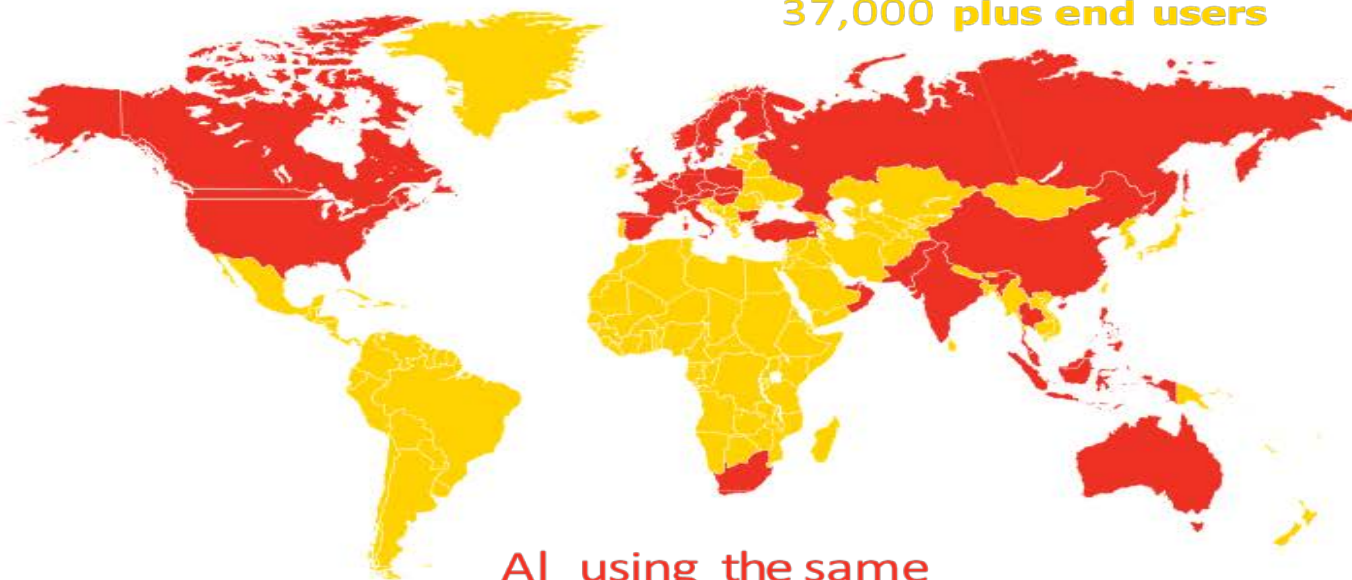

- Global standardization would reduce complexity and costs
- Economies of scale become vital to growth
- Early adopters of global standardization would secure competitive advantage

DOWNSTREAM-ONE STORY

2014 **36 countries**
4 global businesses
2 global service companies
37,000 plus end users

All using the same
Downstream-One platform

2006

- Hungary
- Malaysia

2007

- United Kingdom
- SIPC & SDSI (Two global service companies)
- Hong Kong
- Singapore

2008

- Nordics*
- Denmark Norway
- Finland Sweden
- Germany
- North America Lubes

2009

- Austria
- Switzerland
- Benelux*
- Belgium Netherlands
- Luxembourg
- Indonesia
- Philippines
- South Africa
- Thailand

2010

- Pakistan
- France
- Italy
- Turkey

2011

Operational Excellence

SIMPLIFICATION AND STANDARDISATION

	FROM	TO
Business Models	Fully direct, complex	Simple, low cost
Enterprise systems	~140	1
Connected IT applications	6,000+	~ 250
Back office	Local high cost	Shared services / low cost
Process management	Limited	Operationally excellent, real time by KPI
Customer Service	Variable and inconsistent	Standardised and consistent

What's the Status of your processes?

Don't Automate Chaos

Widely varying Processes at the Start

Business Leads, Not IT

Start Earlier Than You Think

Mobilize Leaders

No Fly Zone

Use Your Best People

Get people READY For THE CHANGE

- Communicate- What Happens, When
- Clear Roles and Responsibilities
- One Team
- Get Them Involved
- Celebrate Successes along the Way
- Don't Forget the Customers
- Training

Aha Moment: Training

Test, retest and test some more

Implementation: You won't feel ready and it won't be perfect
